

# PRASANNA R

Java Full Stack Developer | Spring Boot • React • Microservices • Fintech  
+91 9655921566 • prasannar.0505@gmail.com • linkedin.com/in/prasanna-r-77530916b • Coimbatore, India

## PROFESSIONAL SUMMARY

Results-driven Java Full Stack Developer with 3.7+ years of experience delivering high-performance payment gateway systems and fintech applications. Specialized in Spring Boot microservices, real-time transaction processing, ISO 20022/8583 financial messaging, and event-driven architectures (Kafka, IBM MQ). Adept at building scalable, secure backend solutions for multi-bank integrations and regulatory-compliant fintech platforms.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, Groovy, SQL  
**Frameworks:** Spring Boot, React.js, Grails, REST APIs, Microservices  
**Messaging & Streaming:** Apache Kafka, IBM MQ, ActiveMQ, SwiftMQ  
**Financial Standards:** ISO 20022 (XML), ISO 8583, JSON, Fixed-Length, G3  
**Databases:** MySQL, PostgreSQL  
**Tools & Practices:** Git, SVN, JIRA, Power Automate, Agile/Scrum, System Design

## PROFESSIONAL EXPERIENCE

### Software Engineer | MVI Technologies Mar 2025 – Present

- Architected real-time and batch payment gateway systems supporting multi-bank integrations with sub-second latency across ISO 20022 (XML), ISO 8583, JSON, and fixed-length financial message formats.
- Engineered eGIRO mandate lifecycle workflows (creation & cancellation) ensuring full compliance with direct-debit banking regulations and standards.
- Built fault-tolerant, high-throughput transaction pipelines using Apache Kafka, IBM MQ, ActiveMQ, and SwiftMQ, maintaining 99.9% SLA uptime across production systems.
- Performed performance tuning and debugging of production transaction systems, sustaining SLA compliance under peak load conditions.

### Software Engineer | Freckled Pvt Ltd Jun 2022 – Mar 2025

- Developed and scaled Learning Management System (LMS) features using Java (Grails) and React.js, serving thousands of concurrent active learners.
- Built real-time analytics dashboards for tracking user engagement, course performance, and learning outcomes, enabling data-driven product decisions.
- Designed and deployed an AI-powered learning assistant by integrating ChatGPT API, delivering personalized, context-aware student support at scale.
- Automated JIRA issue creation via Git log analysis, reducing root-cause identification time and accelerating incident resolution across engineering teams.

### Software Developer Intern | Amphisoft Technologies Nov 2021 – Jun 2022

- Completed full-stack training in Java, Groovy, HTML/CSS, and JavaScript; delivered production-ready features and earned the Star Performer award for outstanding quality.

## KEY PROJECTS

- Payment Gateway System:** Designed real-time & batch transaction processing engine supporting ISO 20022/8583 and multi-bank integrations with high availability.
- eGIRO Mandate System:** Built end-to-end mandate lifecycle management (creation & cancellation) compliant with direct-debit banking standards.
- AI-Powered LMS Assistant:** Integrated ChatGPT API into LMS for automated, context-aware personalized student support at scale.
- Automated Error Tracker:** Developed Git log-driven error tracking that auto-generates JIRA tickets, significantly cutting incident response time.

## EDUCATION

BE – Mechanical Engineering | Sri Ramakrishna Engineering College Aug 2018 – Jun 2022  
HSC | SVGV Matriculation Higher Secondary School Jun 2016 – May 2018

## CORE COMPETENCIES

Payment Systems • Banking Integrations • Financial Messaging (ISO 20022 / ISO 8583) • Microservices Architecture • Event-Driven Systems • High-Performance Backend Development • REST API Design • Debugging & Performance Optimization • Agile Delivery

## DECLARATION

I hereby declare that all the information furnished above is true, complete, and correct to the best of my knowledge and belief.
